EDUCATION

BACHELOR OF ART

Kean University
2008 - 2013

KEY SKILLS

HTML/CSS

JavaScript/Typescript

React

React-Native

Webpack

Cypress/Playwright

Node.js/Express.js

Apollo/GraphQL

Next.js

Remix

PROFESSIONAL PROFILE

I'm a front-end developer driven by the excitement of crafting visually appealing and user-friendly applications. A problem-solving enthusiast with a profound understanding of user needs, I take great pleasure in collaborating closely with designers to ensure a top-tier user experience. My areas of interest span across maintaining code quality, utilizing and creating design systems, executing seamless migrations, and the excitement of crafting innovative features. I thrive in a positive, collaborative work environment, finding great satisfaction in mentoring and learning from my peers.

EXPERIENCE

SOFTWARE ENGINEER II

Microsoft, Remote | September 2022 – Present

- Contributed to the rebranding effort of Microsoft's "Glint" product, ensuring alignment with the larger Viva product suite.
- Introduced Storybook into the application's development process, enabling the isolated development of components and fostering collaboration with design teams to meet updated design guidelines.
- Took the lead in developing new features for our product.
- Successfully maintained and managed our charting library.
- Resolved a multitude of accessibility concerns to ensure our product achieved Microsoft compliance standards.

SENIOR SOFTWARE ENGINEER

Ro, Remote | October 2021 – September 2022

- Developed the checkout process for a new product launch within the Roman brand.
- Assisted in the migration project to transition marketing pages from WordPress to Remix.
- Actively participated in conversations aiming to synchronize UI engineers and designers within the Ro organization.

SOFTWARE ENGINEER III

Workday, Boulder, CO | January 2021 – October 2021

- Architected and built new features for the Workday People Experience platform.
- Collaborated with designers to rapidly develop features for A/B testing.
- Contributed to Workday's design system component library.
- Assisted various teams within the organization in adopting and starting with React.

EXPERIENCE - CONTINUED -

SOFTWARE ENGINEER II

Workday, Boulder, CO | June 2019 – September 2020

- Improved performance of our Enterprise Search application by
 - Decreasing the JavaScript bundle by roughly 40%.
 - Decreasing the time to first search result displayed by using server-sent events and the EventSource API to stream results to the client.
- Following a redesign, rebuilt our client-side application with React.
- Increased test coverage significantly in our client-side application.
- Worked closely with designers to improve UX and web accessibility.
- Assisted in maintaining our API written in Kotlin (Previously Node/GraphQL).

SENIOR FRONTEND ENGINEER

HelloFresh, New York, NY | October 2017 – June 2019

- Assisted in the refactor of numerous internal applications which included migrating our last Angular application to React.
- As part of the USA retention team, I was able to quickly build and ship a feature that resulted in an increase of 15 million dollars in revenue.
- Paired program and mentored peers.
- Worked within an agile development environment while collaborating with designers, product managers and other engineers on a stealth startup within HelloFresh.

FRONTEND DEVELOPER

Backbone Labs, Inc., San Mateo, CA | October 2016 – October 2017

- Developed iOS and Android application using React Native.
- Bootstrapped our web application with React.
- Integrated Stripe in our web application.
- Maintained our Express.js node server.
